## Newman Labelling NEWS

Nov 2017

### TAMPER EVIDENT LABELLING SOLUTIONS TO MEET THE REQUIREMENTS OF THE FALSIFIED MEDICINES DIRECTIVE (FMD)

The **Falsified Medicines Directive** (FMD) 2011/62/EU will come in to force by February 2019. This directive requires two mandatory safety features that will enable medicines to be verified and authenticated along the supply chain:

- Tamper evident features on the carton
- A unique identifier (2D data matrix code and human readable information) on the carton

**Newman's range** of automatic tamper evident labellers enables our customers to meet these new regulations, whilst also providing high levels of flexibility, quality and reliability. Designed to apply a range of self-adhesive tamper-evident, anti-counterfeit and hologram labels, a single machine can handle a wide range of carton types and sizes without the need for change parts.

- The **CTE350** is a tamper-evident labeller that operates at speeds of up to 350 cartons per minute and, measuring just over 1m in length, is ideal for integrating in to lines where space is at a premium.
- The **CTE450** operates at speeds of up to 400 cartons per minute and, with track and trace serialisation capability, meets the requirements of the **Falsified Medicines Directive**.

Specifically designed for healthcare applications, the **CTE350 and CTE450** have a stainless steel/GMP construction and are available with full Validation Documentation Package. In addition, Newman Labelling Systems is able to integrate different print and inspection systems to meet our customer's specific requirements.

As a design and manufacturing company, Newman thrives on the challenges that our customers bring to us! If you have a specific labelling requirement then please let us know at [sales@newman.co.uk](mailto:sales@newman.co.uk)

### VISIT NEWMAN IN 2018

2017 has been a busy year for Newman Labelling, but we're already planning ahead for 2018 and have booked shows in Europe and the USA:

-  **Achema**  
11 to 15 June 2018  
Frankfurt am Main, Germany
-  **PPMA Show**  
25 to 27 September 2018  
NEC, Birmingham, UK
-  **PACK EXPO International**  
14 to 17 October 2018  
Chicago, Illinois, USA

We hope you can **visit our stand** and see one of our world beating labelling systems in action.
